Dave – Would you screen this and see if we can get a time to talk after the PFAS event. Thanks

Personal Email / Ex. 6

Hello, my name is Danielle Denman and I am representing the New England High School Journalism Collaborative. I am writing a story about the 2017 bacterial water quality, regarding how the change was possible and what it means for Boston. I would love to pick your brain about your experience with the EPA and the river itself. If you can find the time this week before Thursday, I would love to get in touch, preferably by phone.

Thank you for your time,
Danielle Denman
